**Criterion for listing**

(A) Historical; (B) Rarity; (D) Representative; (E) Aesthetic; (H) Historical association

Moora Park is important because it survives as a remnant of the development of the Sandgate and Shorncliffe area during the latter half of the nineteenth century. The remnant of the bandstand is highly significant as both a focal element of the Park and as a tangible element of Shorncliffe's tourist past. Moora Park is a highly scenic area of parkland, which provides elevated sea views framed by trees.

---

## History

The Moora Park Band Rotunda This part of the foreshore fronting Flinders Parade was the hub of the Sandgate 'seaside experience' from as early as the 1880s. The Sandgate Town Council erected a two-story timber combined kiosk and band rotunda in Moora Park in 1897, also approving a similar one on Flinders Parade.

The structure was designed by Brisbane architect Hubert Thomas, who shortly afterwards moved to Sandgate and designed a number of local buildings. A unique feature of the structure was the covered band rotunda. The Sandgate Town Band was formed around the same time, and performed in the rotunda on public holidays and special occasions.

In 1932 the timber kiosk was replaced with a brick and stucco structure designed by the City Architect, A. H. Foster. This was located on the embankment overlooking the Shorncliffe Pier. The new kiosk operated until the late 1960s when poor patronage forced its closure. It remained abandoned until 1974 when the Brisbane City Council had it demolished.

The band rotunda was retained when the old kiosk was demolished, and was mounted on a low brick and concrete base.

It has been restored in recent years. The rotunda remains the only remnant of Sandgate's seaside entertainment area, which at its peak, included swimming baths and an open air picture theatre.

---

## Description

Moora Park is part of the extensive foreshore parkland that extends from Shorncliffe to Brighton. The Park occupies part of the elevated Shorncliffe bluff and enjoys extensive views across Moreton Bay and to the Redcliffe Peninsula.

The park comprises extensive lawns, shaded by large mature trees. At the southern or highest end of the site is a carpark. The site falls steeply via heavily vegetated embankments to a levelled area beside the water. Structures in the park include an 1897 bandstand, a 1990s replica bandstand, a 1970s picnic shelter and a large

1950s amenities block below the embankments at the northern end of the site. This complex serves the “bathing enclosure” formed by the Shorncliffe Pier and the breakwater to the south of the Pier.

*Note: The extent of this site report does not include the foreshore components of the park (Lots 414-416 on SL 11521) and therefore excludes analysis of the breakwater and the Shorncliffe Pier.*

### **The Bandstand**

The most significant structure in the park is the remnant of an 1897 bandstand and kiosk, designed by H.G.O. Thomas. This is located in a high open area at the southern end of the park and enjoys commanding views of the sea. The bandstand itself is an important focal element in the park. Only the upper level of the original 2-storey structure survives. The octagonal pavilion now rests on a brick and concrete base, (which is largely concealed by a hedge). The ornate timber posts are encircled by a bench seat, except where a set of timber steps provides access to the concrete plinth. The bench seat is supported from the posts by elaborate cast iron brackets. The posts support a perforated ring beam, which in turn supports a corrugated iron roof.

### **Other structures**

#### **Picnic shelter**

This flat-roofed shelter with brick semi-enclosed seating areas is located below the bandstand.

#### **Replica bandstand**

This hexagonal pavilion stands to the east of the original. With its perforated fascia and chunky seat brackets, it attempts to evoke the architecture of Thomas’ bandstand.

#### **Amenities block**

This brick, flat-roofed amenities block accommodates toilets and changing rooms.

#### **Paths and driveways**

Vehicular and pedestrian access to the foreshores is provided by a number of paths and driveways. On steeper parts of the site they are supported by stone retaining walls.

The park has evolved to reflect the decline of Shorncliffe as a bathing and scenic destination. Substantial structures such as A.H. Foster’s 1932 kiosk have gone and the Park is primarily a green, passive recreational space. However the Park contains spaces of great scenic value and its avenue of mature trees provides a shaded alternative to the foreshore path below. The Bandstand, though severely truncated, remains a valuable and scenic remnant of Shorncliffe’s past. A visual inspection of the bandstand reveals it to be in good condition.

The whole of the site is significant with the exemption of the picnic shelter, replica bandstand and amenities block.

---

## **Statement of significance**

### **Relevant assessment criteria**

This is a place of local heritage significance and meets one or more of the local heritage criteria under the Heritage planning scheme policy of the *Brisbane City Plan 2014*. It is significant because:

---

## Historical

### CRITERION A

The place is important in demonstrating the evolution or pattern of the city's or local area's history as a remnant of the development of the area during the late nineteenth century.

---

## Rarity

### CRITERION B

The place demonstrates rare, uncommon or endangered aspects of the city's or local area's cultural heritage as an expression of a once popular form of entertainment in parks.

---

## Representative

### CRITERION D

The place is important in demonstrating the principal characteristics of a particular class or classes of cultural places as a surviving example of Victorian-style Bandstand in its original park setting overlooking Moreton Bay.

---

## Aesthetic

### CRITERION E

The place is important because of its aesthetic significance as a green open parkland with extensive views to the islands of Moreton Bay.

---

## Historical association

### CRITERION H

The place has a special association with the life or work of a particular person, group or organization of importance in the city's or local area's history as a work of Brisbane architect, and Sandgate resident, Hubert Thomas.

**Note:** This citation has been prepared on the basis of evidence available at the time including an external examination of the building. The statement of significance is a summary of the most culturally important aspects of the property based on the available evidence, and may be re-assessed if further information becomes available. The purpose of this citation is to provide an informed evaluation for heritage registration and information. This does not negate the necessity for a thorough conservation study by a qualified practitioner, before any action is taken which may affect its heritage significance.
