

Heritage Citation

St Carthage's School building (former)

Key details

Addresses	At 29 Aberdeen Terrace, Gordon Park, Queensland 4031
Type of place	Church, School, Private school
Period	Interwar 1919-1939
Style	Georgian Revival
Lot plan	L139_SL1463; L137_SL1463; L138_SL1463
Key dates	Local Heritage Place Since — 1 January 2004 Date of Citation — September 2010
Construction	Roof: Terracotta tile; Walls: Face brick
People/associations	John Patrick (Jack) Donoghue (Architect)

This two-storey brick building was opened by Archbishop Duhig on 3 November 1929 as a church/school for the new parish of Gordon Park. The school, which had a capacity for 200 students, was located on the ground floor of the building, while the church, with a capacity for 250, was located above. In 1976, St. Carthage's School was closed due to low attendance, however the building continued to be used as a parish and youth centre for the local Catholic community. Like many Catholic precincts developed in Brisbane by Duhig, it commands an elevated position with an excellent view. It was designed in the Georgian Revival style by Brisbane architect, J.P. Donoghue, who also designed the Holy Spirit Catholic Church at New Farm.

History

This two-storey brick building, designed by Brisbane architect, JP Donoghue, was opened by Archbishop Duhig on 3 November 1929 as a church/school for the parish of Gordon Park. The parish was considered at that time to be one of the most popular and progressive of the new parishes in Brisbane. Gordon Park was previously part of Kedron Parish and Woolloowin Parish. The first parish priest of Gordon Park in 1929 was John McCarthy.

J.P. Donoghue was originally from New South Wales, where he worked for the architectural firm of Hennessy and Hennessy. In 1925-26 he was the Brisbane partner of the firm, then known as Hennessy, Hennessy, Keesing and Co. and J.P. Donoghue. From 1926-1937, Donoghue had his own practice in Brisbane. Other churches he designed include the Holy Spirit Church in New Farm (1930). Donoghue died in 1960.

The building was designed with a school capable of accommodating around 200 children on the ground floor and a church situated above with a capacity of 250. The intention was to eventually use both floors as a school when a new church was built. The church/school, presbytery, furnishings and the four allotments which made up the site cost a total of £4,498. The presbytery was formerly a private home. The contract for the building of the church was given to Concrete Constructions, who had recently completed the foundations of the planned Holy Name Cathedral. The foundation stone of the church/school was laid by Archbishop Duhig on 28 July 1929.

The parish school opened in July 1930, with 29 students under the tutelage of the Sisters of Mercy who travelled daily from the Holy Cross Convent at Woolloowin. Numbers at the school increased quickly to 79 later in the year. The school's population was boosted again when students from the Stafford Parish attended while their own school was constructed. The interwar years were a period of rapid growth in Gordon Park. As was the case with many Catholic and secular schools, unemployed labour was used to level the school grounds during the years of the 1930s depression. Men of the parish were among those who worked in the grounds under this scheme.

On 26 June 1966 a new church and presbytery was opened by Archbishop Patrick O'Donnell. The new buildings were designed by architects Corbett and Ryan and cost over \$92 000, including furnishings.

From 1975, the teaching staff of St. Carthage's School were led by a lay principal, Mr. E. Pender. It was one of the first schools in the Archdiocese of Brisbane to be controlled and staffed with lay teachers. The school closed at the end of 1976 as the number of students (86) was considered by the Brisbane Catholic Education Office to be financially unviable. After the closure of the school, the building was used as a youth centre for the Deanery and parish venue for social and indoor sporting activities.

The St. Carthage's school was a focus of Catholic worship, education and social activity for the local Catholic community for more than half a century.

Statement of significance

Relevant assessment criteria

This is a place of local heritage significance and meets one or more of the local heritage criteria under the Heritage planning scheme policy of the *Brisbane City Plan 2014*. It is significant because:

Historical

CRITERION A

The place is important in demonstrating the evolution or pattern of the city's or local area's history

as a Catholic church/school built to service the spiritual needs of the local Catholic community during the interwar period. Gordon Park grew rapidly as a residential suburb at this time.

Aesthetic

CRITERION E

The place is important because of its aesthetic significance

as a well designed imposing masonry building on a prominent site.

Social

CRITERION G

The place has a strong or special association with the life or work of a particular community or cultural group for social, cultural or spiritual reasons

it is significant for its importance to successive generations of the local Catholic community since 1929.

Historical association

CRITERION H

The place has a special association with the life or work of a particular person, group or organization of importance in the city's or local area's history

as a good example of a combined church/school building designed by respected Brisbane architect John Patrick (Jack) Donoghue.

Note: This citation has been prepared on the basis of evidence available at the time including an external examination of the building. The statement of significance is a summary of the most culturally important aspects of the property based on the available evidence, and may be re-assessed if further information becomes available. The purpose of this citation is to provide an informed evaluation for heritage registration and information. This does not negate the necessity for a thorough conservation study by a qualified practitioner, before any action is taken which may affect its heritage significance.
